

## Crochet Wood Ring Teether

### Materials:

Cotton yarn, I just used a tiny bit from this ball of [Bernat Maker Home Dec Yarn](#) in Fiesta Varigate.

Size K crochet hook

2" wood ring

Yarn needle and scissors

### Stitches used:

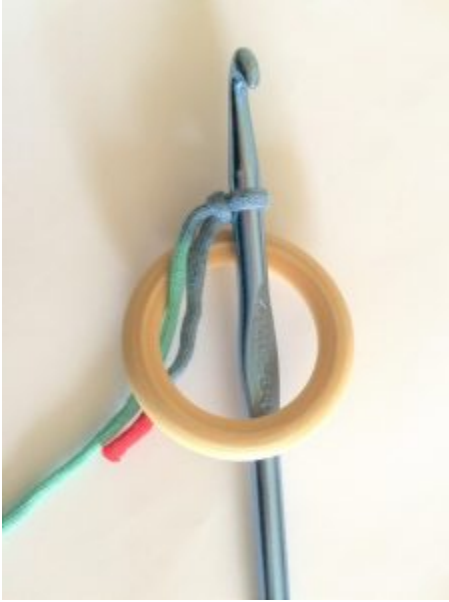

slip knot-make a loop with your finger, insert your hook (& remove your finger), yarn over and pull through the loop, securing yarn to your hook

slip stitch-yarn over, pull up a loop and pull it through the loop on your hook

single crochet-insert hook, yarn over & pull up a loop, yarn over and pull yarn through the two loops on your hook.

Steps to create your wood ring teether:

Slip knot on your hook and insert it into the wood ring.

Slip stitch onto the wood ring, chain 1.

Single crochet around most of the ring. Be sure to work over your tail.

Continue to single crochet, as many as you like.

I worked 16 single crochets, which covered my tail and about 2/3 of the wood ring.

Weave in your tail.

Be sure to weave it in one direction and then the other to prevent it coming loose.

I crossed the stitches to the other side to weave it back towards the end.

Trim the excess and you're done!

You crocheted your own wood ring teether!
